## POWER SOURCE

Features of the: PDV-30 Series

## Constant <br> Voltage PWM Output

(4) AC Input Range:

200-240VAC with PFC

Protections:

- Short Circuit
- Over Load
- Over Current
- Over Temperature

Class II
Power Supply

IP20 Design
For Indoor
Installation
Cooling by
Free Air
Convection
Factory
Fitted Flex
and Plug
Compatible
with Most
Leading and
Trailing Edge
Dimmers

## Mechanical Specification

- Connect LED to LED driver via screw terminals under removable cover. Positive (LED+), Negative (LED-).
- Suggested output wire diameter: $0.5-2.5 \mathrm{~mm}^{2}$.
- Incorrect wiring could result in damage to the power supply, which is not covered by the warranty.
- Contact your supplier with specific input, or output configuration requests.

## Dimming Operation

- Dimming is with installing a leading edge, or trailing edge dimmer across the AC input.
- Compatible with most leading and trailing edge dimmers. Australian compatibility chart available on request.
- It is recommended that a dimmer, with a power rating three times higher than that of the rated output of the LED driver is used.

## Connection Diagram

- Single Driver Connection Diagram.

## Connection Diagram

- Multiple Drivers Connection Diagram.

## De-rating Curve

- If being used in higher ambient temperatures, ensure the load on the LED driver is de-rated in accordance with this chart. Failure to do so could lead to a failure, which is not covered by the warranty

## Instruction:

1) This LED driver should be installed by a qualified electrician.
2) Please make sure the LED driver is installed with adequate ventilation around it to allow for heat dissipation.
3) Ensure that all wiring is correct before testing in order to avoid damage to the LED driver, or the LEDs.
